

GF 16 Crane Systems The Tallest Camera Crane in Town.....

The GF-16 Crane is the ultimate in "big" modular, rideable and remote crane systems. It is designed and engineered incorporating the latest technology and is the result of many years experience in the crane business. The result is a state of the art crane system which addresses the demands of the crane operator when it comes to safety, transport, ease of assembly and in-shot stability but also gives the DP an amazing range of choice to create that dream shot.
